Easy Fold

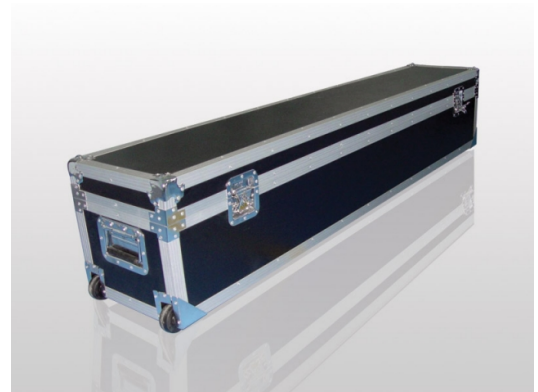

Portable Screens

Foldable screens supplied with flight-case with wheels, easy to carry and reliable. Frame totally made of anodized aluminum to ensure lightness, stability and stiffness. The two side supports are fixed to the frame with simple knobs and are height adjustable. The screens are supplied with frontal projection and rear projection fabrics, equipped with snaps all along the sides for easy and quick mounting on the frame. Easy Fold is the perfect solution for rental applications, thanks to the high quality manufacture, the sturdy structure and easy to use during the mounting / dismounting procedure..

- “White” (for frontal projection) and “Rear Pro” (for rear projection) fabrics are standard supplied.
- Fabric front mounting on the structure by snaps for quick installation and perfect flatness.
- Anodized aluminum frame, section 32x32 mm. The screens over 200” are supplied with reinforced structure (double profile combined with crossbars at regular intervals) to ensure maximum stability and durability.
- All the screens are standard supplied with a couple of aluminum uprights for ground positioning, in case it is not possible to fix it to the wall. The type of uprights depends on the size of the screen, to always get maximum stability and safety.
- Flight case with handles and wheels for easy transport.
- Each supply includes: flight case, folding aluminum frame, frontal projection screen, rear projection screen, floor folding uprights.
