Telescopic, for wall-ceiling mounting

Wall and ceiling video projector brackets, in light and elegant aluminum, adjustable. The angle of inclination of the projector can be adjusted to obtain an optimal projection. The fixing plate offers a solid anchorage and it is hidden by a plastic cover. The cables can be passed inside the arm of the bracket, for the maximum security.

- Conversion kit from wall to ceiling bracket available on request.
- Aluminum bracket painted white
- Telescopic arm, from 65 cm. to 125 cm.
- Cables passage inside the arm of the bracket.
- Inclination ($\pm 42^\circ$) and rotation (360°) of the vertical plane obtained by manual adjustment of the tilting joint to the desired position thanks to the special locking key (supplied).
- Maximum load Kg. 12
