New2000 Modular support system for IWB

The simple and effective solution for all problems related to the correct positioning of the projector, the harmonization of the various components of the IWB and the need to hide the cables. New2000 is a modular ups and downs structure that offers different combinations to meet all needs; for wall or plasterboard mounting; with trolley and wheels for mobile applications; with manual or motorized movement; for short or ultra short throw projectors. New2000 can also be equipped with various shelves (fixed or mobile) for loudspeakers, notebooks, viewers, printers, etc... The possibility to adjust manually or with electric motor the height of the LIM, keeping unchanged all the associated peripheral settings, makes New2000 adapt to users of different ages and stature, and is therefore ideal for use in contexts of all kinds, from elementary to university, always with maximum comfort. In the mobile trolley version, the arm for the ST projector can be rotated of 90°, while with the UST projectors it is possible to equip the support bracket with a tilting unit to lower the projector. These options allows New2000 to pass through doors and narrow corridors, without changing the settings of the modular support.

New2000

Modular support system for IWB

BASIC STRUCTURE	
NW20001	Manual operation of the entire structure (by means of hydraulic piston), for ST projectors (0,45:1 ~ 0,6:1); 90° rotating arm. Without micrometric adjustment.
NW20002	Manual operation of the entire structure (by means of hydraulic piston), for UST projectors (0,19:1 ~ 0,4:1), preset to use the original brackets of Sanyo/Benq/Epson projectors (others on request). Video projector micrometric height adjustment.
NW20003	Motorised operation of the entire structure, for ST projectors (0,45:1 ~ 0,6:1); 90° rotating arm. Without micrometric adjustment.
NW20004	Motorised operation of the entire structure, for UST projectors (0,19:1 ~ 0,4:1), preset to use the original brackets of Sanyo/Benq/Epson projectors (others on request). Video projector micrometric height adjustment.
NW20005	Manual operation of the entire structure (by means of hydraulic piston), for UST projectors (0,19:1 ~ 0,4:1), preset to use the original brackets of Sanyo/Benq/Epson projectors (others on request). Without micrometric adjustment.
NW20006	Motorised operation of the entire structure, for UST projectors (0,19:1 ~ 0,4:1), preset to use the original brackets of Sanyo/Benq/Epson projectors (others on request). Without micrometric adjustment.
WALL INSTALLATION	
NW20010	Brackets kit for wall mounting (obligatory)
NW20011	Floor stands for plasterboard walls (optional)
TROLLEY INSTALLATION	
NW20012	Back panel (obligatory)
NW20013	Trolley with drawer and wheels
NW20014	Basic trolley without drawer
NW20015	Drawer for basic trolley
ACCESSORIES	
NW20016	90° tilting unit for UST projectors
NW20017	Fixed shelf for notebook / document camera / A4 book — mountable both on the right and on the left
NW20018	Foldable shelf for notebook / document camera / A4 book — mountable both on the right and on the left
