

Magnetic Whiteboard

Enamelled steel surface with matte finish

Magnetic boards with white enamelled steel surface and matte finish, ideal both for writing with dry erasable felt pens and for projection. Particularly suitable for intensive and prolonged use; the surface is resistant to wear, corrosion, scratches, is hygienic and easy to clean with felt erasers and. Ideal for use in any context where a writing and projection surface is required: schools, universities, executive offices and training centres.

- Matt white enamelled steel surface, worked at 800 °, suitable for writing with dry erasable felt pens, for intensive use
- Magnetic surface suitable for the application of magnetic elements and for the posting of documents by means of round magnets
- Perimeter frame in silver anodised aluminum, section mm. 20x10
- Rounded corners in light grey RAL7035 mopen.
- Silver anodised aluminum pen tray, with side bumpers in mopen
- Wall mounting kit consisting of 4 metal supports that distance the board from the wall of cm. 2, to allow the hidden passage of cables.
- The boards are produced respecting the ergonomic, technical and safety requirements, in compliance with the UNI EN 14434/2010.
