

Projection > Screens On Frame

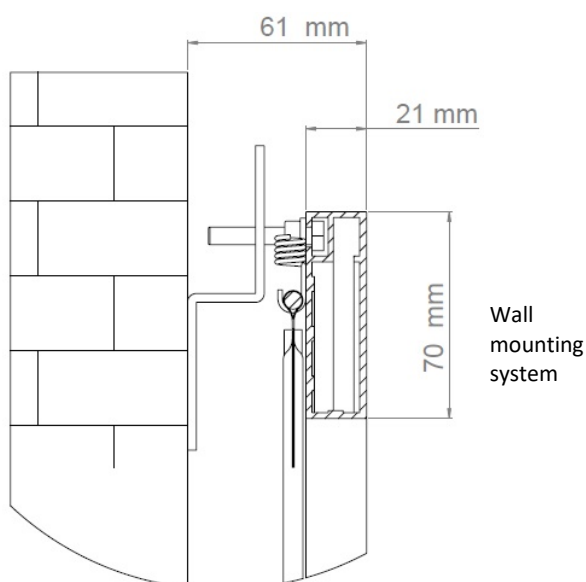

Rigid Velvet

Frame screen

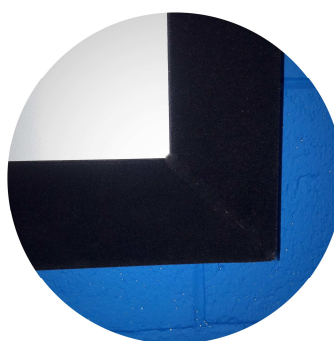

Rigid Velvet are professional screens that meets the highest quality standards, specially designed for home-cinema installations. The frame is in aluminum section mm. 70x20 covered with black velvet. This solution, besides the aesthetic reason, allows the total absorption of the reflected light. The projection surface is fixed to the back of the frame with steel torsion springs. This system guarantee durability and constant tensioning of the fabric, even in environments with variable temperatures. Rigid Velvet screens are supplied with wall brackets and offers a wide selection of projection surfaces, to satisfy every customer needs.

- Available projection surfaces White, Hi-gain White, Contrast Grey and 3D White Alu, ratios 4:3, 16:9, 16:10 and 21:9.
- Aluminum frame section mm. 70x20, covered with black velvet.
- Mounting of the projection surface on the back of the frame with steel torsion springs and pvc rods.
- Wall mounting brackets.
- Packed in strong double cardboard box.
