Rigid Velvet

Frame screen

Rigid Velvet are professional screens that meets the highest quality standards, specially designed for home-cinema installations. The frame is in aluminum section mm. 78x20 covered with black velvet. This solution, besides the aesthetic reason, allows the total absorption of the reflected light. The projection surface is fixed to the back of the frame with steel torsion springs. This system guarantee durability and constant tensioning of the fabric, even in environments with variable temperatures. Rigid Velvet screens are supplied with wall brackets and offers a wide selection of projection surfaces, to satisfy every customer needs.

- Available projection surfaces White, Hi-gain White, Contrast Grey, Micro Sonora and Rear Pro; ratios 4:3, 16:9 and 16:10.
- Aluminum frame section mm. 78x20, covered with black velvet.
- Mounting of the projection surface on the back of the frame with steel torsion springs and pvc rods.
- Wall mounting brackets.
- Packed in strong double cardboard box.
