BigSuper Inceeling 420-690

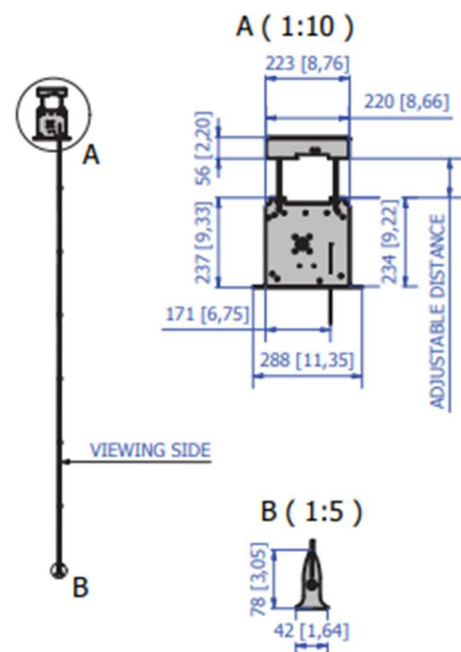

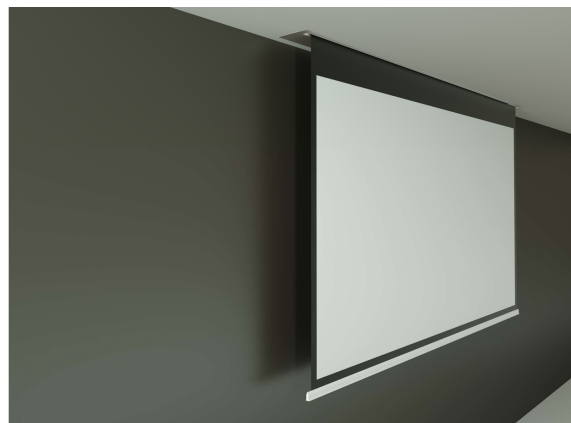

Motorised screens

Invisible screen, completely hidden in the false ceiling when closed. BigSuper Inceeling is the right choice for large venues purposes where aesthetics is the primary need, in fact the projection surface comes down and it is visible only when it is used. These screens are the ideal solution for permanently installed applications in large environments, equipped for a large audience where it is therefore necessary to have high quality projections, such as for example congress halls, theatres, auditoriums and other large professional spaces. Main features are: the counterweight that perfectly closes in the case when is closed; the special electric motor that slowdown when closing and that feels the stop, avoiding the stretching of the projection surface with the time. BigSuper Inceeling screens can be supplied with and without black borders, with and without lateral tensioning system, with the case available in white and black colour.

- Screen totally hidden in the false ceiling.
- Available projection surfaces: White, Hi-gain White, Sonora and Rear Pro, ratios 4:3, 16:9 and 16:10.
- Available with and without black borders.
- Available with and without lateral tensioning system.
- Front unrolling of the projection surface.
- Electric motor standard mounted on the right side of the case.
- Aluminum case painted white or black colour.
- Limit switches factory adjusted, possibility to change the settings if necessary. The screen can be stopped at intermediate positions with the electric switch.
- Adjustable ceiling fixing kit.
- Wall electric switch included in the standard supply.
- Radio remote control available on request, with external or built-in receiver.
- Screen CE certificated, 24 months warranty from the purchase date, at the conditions indicated in the instruction booklet.
